Fire Extinguisher Training

EMPLOYER RESPONSIBILITY

OSHA Requirements: 1910.157 (g) Training and Education.

- 1910.157 (g) (1) Where the employer has provided portable fire extinguishers for employee use in the workplace, the employer shall also provide an educational program to familiarize employees with the general principles of fire extinguisher use and the hazards involved with the incipient stage fire fighting.
- 1910.157 (g) (2) The employer shall provide the education required in paragraph (g) (1) of this section upon initial employment and at least annually thereafter.
- 1910.157 (g) (3) The employer shall provide employees who have been designated to use fire-fighting equipment as part of an emergency action plan with training in the use of the appropriate equipment.
- 1910.157 (g) (4) The employer shall provide the training required in paragraph (g) (3) of this section upon initial assignment to the designated group of employees and at least annually thereafter.

HIRDCO SOLUTION

- Training classes to meet your needs and OSHA requirements: Public schools, colleges and universities, industrial parks with manufacturing companies, hospitals, medical centers, elderly care facilities and office parks.
- Our classroom style of training will include a training video and handouts which provide: an overview of the different sources of fire, describe classes of fire, how to identify an extinguisher and the type(s) of fire it is rated for, assessing and measuring fire risk, understanding how fire extinguishers fit into the overall emergency response plan and how to use a fire extinguisher safely.
- Automatic scheduling of annual training in advance: will provide the peace of mind of not having to think about the annual OSHA requirement and enable you to concentrate on your core business.
