

### **Analog Addressable Systems**

AUTOPULSE detection, control and fire suppression system release panels provide automatic 24/7 fire protection. Agent Releasing Control Panels are designed with modularity and easy system planning. The panels can be configured with just a few devices for small building applications or for a large campus or high-rise application.

### **Conventional Systems**

AUTOPULSE detection, control and fire suppression system release panels provide automatic 24/7 fire protection. Detection options include smoke, heat, and flame detection. The control panels process detection signals from protected areas and immediately perform key operations including sounding alarms, shutting down equipment and

### **VESDA® Detection Equipment**

VESDA aspirating smoke detection technology offers the earliest possible warning of a potential fire.
