

Security Lock Options

MECHANICAL LOCKS AND KEYS

HSL II DEADLOCK + HSL III LATCH

GENERAL DESCRIPTION: Larsen's mechanical security locks are manufactured to cover the full range of security requirements for all types of detention facilities. Virtually pick-proof, these high-security deadlocks and latches are a perfect complement to Larsen's line of detention fire protection cabinets and access panels.

KEYS: All Larsen's prison paracentric keys are registered before shipment. Therefore, additional or replacement keys can be ordered easily; even years later. Keys, however, are sold only to properly authorized dealers. All keys are sold separately as accessories and are NOT included with locks.

MODEL HSL II DEADLOCK

Use: Fire department valve cabinets, fire hose cabinets, fire extinguisher cabinets and access panels.

Specifications:

- **Deadlocks and Unlocks by Key**
- **High Tensile Strength Alloy Steel Case and Cover**
- **Corrosion Resistant Working Parts**
- **Deadbolt** - High strength solid bronze
- **Five Lever Tumblers** - Made of spring-temper brass
- **Key Cylinder** - One piece bronze alloy with paracentric keyway
- **Bolt Size** - 1½" x ¾"
- **Bolt Throw** - 5/8", projects 1/2" when retracted
- **Handing** - Specify left or right
- **Finish** - Painted or plated for corrosion resistance.

NEW ELECTROMAGNETIC LOCK OPTION

DESCRIPTION: For use with fire extinguisher cabinets, fire department valve cabinets, and fire hose cabinets. Electromagnetic locks provide keyless, automatic door release and access to life safety equipment when electric power is interrupted or when otherwise activated by remote control panel.

Specifications:

- **Direct hold design with approximately 600 lb. holding power**
- **Corrosion resistant case and no moving parts - virtually maintenance free**
- **Flexible, self aligning strike plate**
- **Larsen's supplies and installs lock and strike plate *only* - wiring, power source, control panel, and other components are supplied by others**
- **Contact factory for specification and ordering procedure**

SPECIAL LOCKS

OWNER SUPPLIED-

- Larsen's will require a sample of the complete special lock (owner supplied) before quoting and fabricating detention cabinets or access panels.
- Larsen's will install the special locks at the factory or determine if it is possible to prepare the doors for field installation.

LARSEN'S SUPPLIED-

- Larsen's will require the complete lock specification before quoting and fabricating detention cabinets or access panels.
- Larsen's will purchase and install locks at the factory.
