

Exterior Access Panels

Larsen's exterior access panels (**L-XT**) are designed to provide efficient and quick access in exterior applications. The insulated and gasket panel design keeps the elements out of the building - even in the harshest environments. Dual acting handles allow convenient access from inside or outside the building.

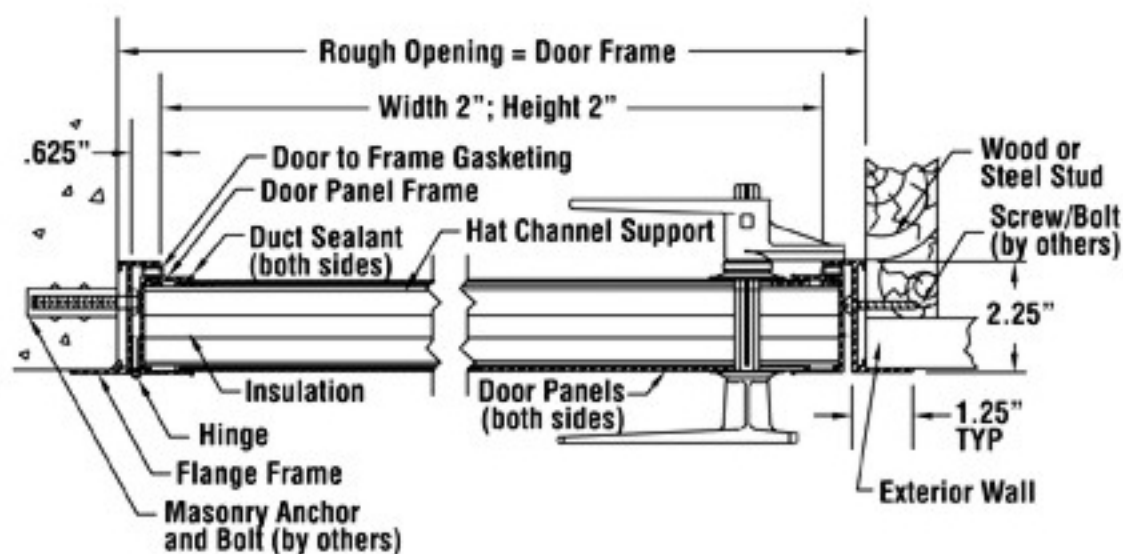

L-XT

Exterior Access Panels

Optional locking handle does not have an inside handle

L-XT	Part	Description
X	Door	20 ga. cold rolled
X	Door	[Optional .060" aluminum]
