

Fire Extinguisher Cabinets

Vista Series

**GENERAL DESCRIPTION:** The Vista Series has the same aesthetic and practical features of the Cameo. The fire extinguisher is projected into a protruding bubble, allowing for full 180 degree visibility and for installation into a shallow wall depth (4"). The fire extinguisher is supported by the manufacturer's standard bracket. The unique Vista bubble door eliminates the need for a door frame.

**BOX SPECIFICATION:** *Identical to the Architectural Series.*

**TRIM SPECIFICATION:** Steel trims are one piece, constructed of cold-rolled steel with a standard finish of white baked acrylic enamel, which can be used as either a finish or prime coat. Aluminum trims are constructed of extruded aluminum with satin anodized finish. Clear anodized is standard, and a wide selection of optional color anodized finishes is available. All trim corners are mitered. To specify aluminum trim, use the prefix "AL" before the cabinet model number. Stainless steel trims are one piece, constructed of #4 finish, 304 stainless steel. To specify stainless steel trim, use the prefix "SS" before the cabinet model number.

**DOOR SPECIFICATION:** The Vista door is a frameless clear acrylic bubble with a chrome plated pull knob, magnetic catch, and continuous piano hinge which matches the trim material. The standard Vista bubble is clear acrylic and red acrylic is available as an option, if specified.

TO SPECIFY THE VISTA SERIES:

- 1. Use the appropriate prefix for the trim material.  
If steel - no prefix is required.  
If aluminum - use "AL".  
If stainless steel - use "SS".
- 2. Select the required model number from the table below.
- 3. Indicate the optional red acrylic bubble (clear is standard).

All recessed Vista cabinets comply with all ADA wall projection guidelines. surface-mounted vista cabinets' compliance with ADA wall projection guidelines depends on several location and installation issues. Please refer to the "introduction" profile.

DIMENSIONS					
Model Number	Trim Style and Projection	Inside Box Dimensions H x W x D	Outside Trim Dimensions H x W*	Rough Opening H x W x D	Recommended Extinguisher Capacity
