

SUBMITTAL: AGF RECESSED FLOOR DOOR

Model AGF is a fully recessed aluminum floor door to be installed flush with the surrounding floor surface.

Frame: The door frames are an engineered gutter frame design in extruded aluminum shapes specially designed for floor doors. The gutter is equipped with a 1-1/4" FTP drain coupling allowing for water runoff. The door is made from reinforced 1/4" diamond plate for greater strength. The door is hinged such that when open, the door does not penetrate the gutter, thus preventing problems due to freezing or contaminating buildup. Mill finish.

Door: Reinforced 1/4" diamond aluminum plate. Mill finish.

Hardware: Stainless steel hinges are bolted to the door and frame to minimize galvanic corrosion. All fasteners are tamperproof stainless steel bolts. Stainless steel slam locks, gas assist opener, hold open arm.

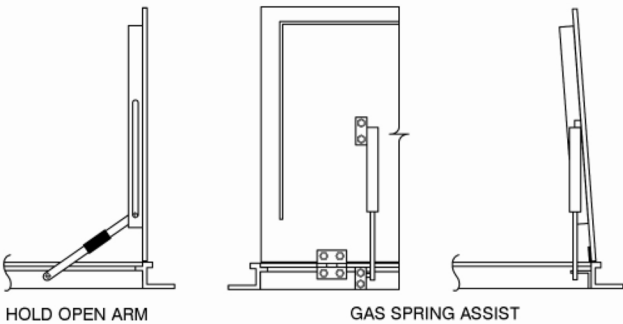

Finish: Mill with bituminous coating below grade.

Load: 300 lbs./ft.²

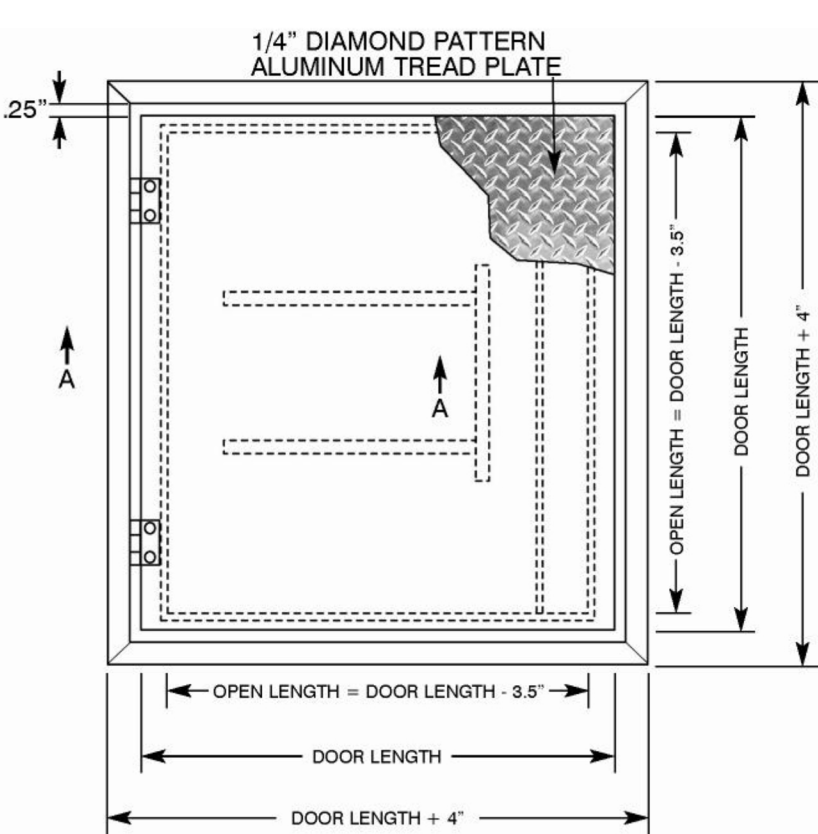

Sizes: We can fabricate to any size requirement.
